FLORIDA MEDICAL GAS RENEWAL POLICY

Florida Medical Gas Certification is a certified training company for anyone who qualifies to perform installation and service on any health care facility that requires medical gas. We are certified by the Florida Construction Industry Licensing Board, and we comply with the National NFPA and ASSE 6000 Standard.

We have adopted the American Welding Society Brazing Performance Qualifications for Medical Gas Installers, Contractors, and Hospital Maintenance Workers. The certification qualifies the Installers to braze medical gas systems up 5" in diameter. The brazing course is conducted after the installers pass the classroom course with a certified instructor and passing a 100 question exam. The brazing certification must be renewed within a 6 month period based on the NFPA requirements.

To keep your license valid / in good standing, you must renew the brazing portion of your license every 6 months and stay current with code change / continuing education, the state of Florida currently adopts the new NFPA code every 3 years. A continuing education course will be offered by FMG for the code change to remain in compliance.

If you miss 2 consecutive renewals, your license will be made INACTIVE, for reinstatement you must complete the full course at regular price.

As a courtesy, FMG sends out renewal notices, however, your license is your responsibility. If you move, get a new phone number or email address it is best to send our office an email to notify of the change of information to info@floridamedicalgas.com.
